## EDUCATION

- **University Carlos III** Madrid, Spain  
*Computer Science MSc* *Sep 2022 - Present (Expected Graduation on Jan 2024)*  
*Courses:* High-Performance Computing, Computer Networks Design, Cybersecurity, Advanced AI Applications, Project Management.
- **University of Nottingham** Nottingham, UK  
*Computer Science BSc (First Class Honours)* *Sep 2019 - Jun 2022*  
*Courses:* Data Structures, Operating Systems, Advanced Algorithms, Artificial Intelligence, OOP, Networking, Relational Databases.

## EXPERIENCE

- **Software Engineer** Madrid, Spain  
*STAR [Student Association For Rocketry] (Part-time)* *Sep 2022 - Present*
  - Developed new data-plotting and formatting features in an existing **Python** GUI application for real-time rocket data visualization, resulting in the app replacing an external alternative used in certain parts of the organization.
  - Integrated the new features into the application's custom configuration language, making it simpler for other developers to add new functionality.
  - Achieved performance improvements of 8.3x in certain code paths responsible for plotting incoming data by avoiding unnecessary redraws.
  - Led the implementation of unit testing in the GUI application's codebase using **pytest**, achieving a test coverage of 80%.
- **Full-Stack Developer** Remote  
*Freelancing (Part-time)* *Dec 2019 - Sep 2021*
  - Built and led a community around a subscription software product with over 50 concurrent monthly customers and more than 600 members.
  - Designed and implemented a full-stack web application using **React.js** and **Express.js** that handled user authentication, user settings, and advertising, resulting in a 46% quarter-on-quarter increase in monthly customers.
  - Developed a Windows 10 kernel driver using **C++** to implement HID (Human Interface Devices) input interception.
- **Open Source Developer** Remote  
*Open Source Community (Part-time)* *Aug 2018 - Present*
  - Collaborated on the development process of multiple established **C++** codebases, including SerenityOS, Nix, Linux, and Electron, successfully contributing over 100 commits and PR reviews.
  - Contributed to major Linux distributions by developing and publishing packages. Successfully managed the open-source development lifecycle to achieve over 160 weekly downloads for some of my most notable projects.
  - Authored and contributed over 20 new features and fixes to a popular game's utility mod written in **Kotlin**, ranking second among all committers in its most recent major release.

## PROJECTS

- **OSSE - Crawler-Based Search Engine (Web Crawlers, IPC, Concurrency, Web Development):** (Work in progress) Research-oriented, open-source, modular crawler-based search engine. **Tech:** Rust, Yew, Nix, JSX. (Oct 2022)
- **OSLS - Rocket Launch Simulator (Physics Simulation, Game Development):** Simple rocket launch simulator with its own physics engine, allowing for basic orbital mechanics. **Tech:** Python, PyGame, Nix. (Feb 2022)
- **OSXIV - Image Viewer (Image Processing, SDL):** Simple X11 image viewer with support for image zooming and translation that is compatible with multiple image formats. **Tech:** C, SDL2. (Oct 2020)
- **pOS - Operating System (Operating System, Memory Management, Kernel Drivers):** Bare-bones x86 operating system kernel with a custom basic C library. Includes TTY and keyboard drivers plus basic command shell support. **Tech:** C++, x86 Assembly, Makefiles, Linker script. (Aug 2020)
- **gProxy - Multi-Use TCP Proxy (Network Development, Concurrency):** Multi-purpose TCP proxy to allow for packet forwarding and inspection. **Tech:** Go, BSD Sockets. (Jul 2020)

## VOLUNTEER EXPERIENCE

- **Member of the Amplify Program** London, UK  
*The Faith and Belief Forum (Part-time)* *Oct 2018 - Jun 2019*
  - Conducted and participated in social workshops and student training, impacting over 100 students and volunteers.

## SKILLS SUMMARY

- **Languages** Python, Rust, C++, Go, Kotlin, Haskell, JavaScript, Bash, Java, Lisp, SQL, Zig.
- **Tools** Git, Docker, Linux, Nix, Azure, Emacs, AFL.
- **Frameworks** React.js, Express.js, Flask, MongoDB, PyTest, Spark, Yew, Tkinter, PyTorch.
- **Soft Skills** Curiosity, Proactivity, Writing, Adaptability, Listening, Collaboration, Creativity.
- **Spoken Languages** Spanish & English (*Fluent*), French (*Beginner*).
- **Additional Interests** Astronomy, Decentralization, Memory Safety, Aerospace, Operating Systems, Surfing.
